

"We undertook a total refurbishment of five of our six science laboratories during term-time, an ambitious project made much easier by the professionalism and commitment of Klick. From initial conversations through the design phase and finally the construction period, each member of the Klick team provided us with first-class service backed up by sensible and budget-conscious advice."

Eleanor Sharman – Bursar, Rendcomb College, Cirencester, Gloucestershire

Velstone benching

Fume cupboards

Sink drainer grooves

Removeable sink cover

Science block refurbishment for **Rendcomb College, Gloucestershire**

Value: £93k

Duration of works: Phased 5 week programme

Project Details:-

- > Free comprehensive design and consultation service
- > 2D and 3D CAD drawings provided, illustrating layouts
- > Full project management service
- > Installation of water heaters
- > Supply and installation of 2 fume cupboards
- > Installation of new electrical and plumbing services
- > Supply and installation of furniture
- > Fitted gas proving system
- > Final connections, commissioning and certification of all works

The project included the term time refurbishment of two chemistry labs, two physics labs and one biology lab.

The brief was to design a layout to incorporate a designated theory space and a separate practical area into one large room. The design developed into an interesting layout including large double sided island benches with softly curved Velstone worktops at each end. The client wanted to give the rooms a sleek, modern appearance which was further enhanced by the vibrant contrast walls.

Klick provided extended first fix and final connections, working closely with the school's appointed mechanical & electrical consultants and providing details of the pick up points required for each of the benches.

Klick supplied the fume cupboards, connecting them both to an existing outlet point in order to avoid an application for planning permission.

The college were delighted with Klick's contribution to this budget sensitive project.
