Science laboratory refurbishment for **Southmoor Academy, Sunderland**

Value: £30k

Duration of works: 3 weeks

Project Details:-

- > Free comprehensive design and consultation service
- > 2D and 3D CAD drawings provided, illustrating layouts
- > Full project management service
- > Channel floor to accept new services where required
- > Install new mobile fume cupboard docking points
- > Installation of new electrical and plumbing services
- > Supply and installation of furniture
- > Flooring renewed
- > Fitting of gas proving system
- > Final connections, commissioning and certification of all works

The academy is opening a sixth form this September and needed a new science laboratory with an inspirational design on a limited budget.

Klick Technology explored many different design options and presented CAD layouts. The teaching staff selected the elliptical "learning curve" design which was modified to suit the available space. The crescent shape creates real impact and yet is practical in that it can accommodate 30 students. The science department opted for 25mm Velstone work tops which enhanced the sleek look of the room and added to the impact.

We proposed a partial refurbishment to keep costs to a minimum and our staff worked closely with the academy site team, re-using some existing perimeter benching. The work was completed in term time, taking advantage of our term time discounts and the academy is delighted with their new sixth form lab.
