

Food Technology Room Installation

Pipers Corner School, High Wycombe

“Excellent project. Thank you.”

P.R. Forrester – Bursar, Pipers Corner School, High Wycombe, Bucks

Trespa Black Craquele worktops

Neff 'Slide & Hide' ovens with door retracted

Stainless steel sinks & co-ordinating taps

Demonstration/theory area

PROJECT BRIEF

Klick Technology were briefed to design a food technology room to replace an existing catering room. The room was to accommodate 20 students and to include a large demo area which would also be suitable for theory lessons.

THE RESULTS

The school had a particular vision of how they wanted the room to look. They selected Trespa Black Craquele for the work tops and Burgundy door fronts. Klick supplied co-ordinating Trespa topped tables. The teaching staff wanted these tables to be mobile, giving them the flexibility of being able to move the tables around easily for theory lessons. The fittings were in satin chrome to co-ordinate with the black worksurfaces and the staff selected Neff 'Slide & Hide' ovens, with doors that become fully retracted into a cavity when opened, helping to maximise limited space.

Klick completed a partial refurbishment of the room. The ceilings were relatively new and therefore did not need to be replaced. The existing ducting system was modified, with the addition of ventilation grills so it could be retained for use in the new domestic room, which helped to maximise the budget. The teaching staff are delighted with the new room and have created a forum on Facebook with their positive feedback.

PROJECT DETAILS

- Free comprehensive design and consultation service
- 2D & 3D CAD drawings provided
- Full project management service
- Removal of existing furniture and redundant services
- Careful removal of existing catering equipment for school to sell to raise funds for the project
- Installation of new electrical and plumbing services
- Extend electrical services to 10 cookers
- Replace/cap off radiators
- Supply and install 8 ventilation grills
- Supply and installation of furniture
- Decoration renewed throughout
- Final connections, commissioning and certification of all works.

PROJECT DESCRIPTION

Conversion of catering room into food technology room.

VALUE

£32k
