

Classroom Refurb & Installation of Teaching walls

Tewkesbury School, Gloucester

"The building phase of the project started during school term time and the team were able to minimise the disruption to our still functioning school and to the students who were still using the areas close to the project. They were professional, courteous and above all outgoing which helped ease the project through the key stages of work.... The final result is classrooms that have been purpose built, which have dramatically improved the feel of the school within this area. Both students and staff alike have complimented the high standard of work and the professionalism that Klick showed throughout the project. We would highly recommend Klick Technology!"

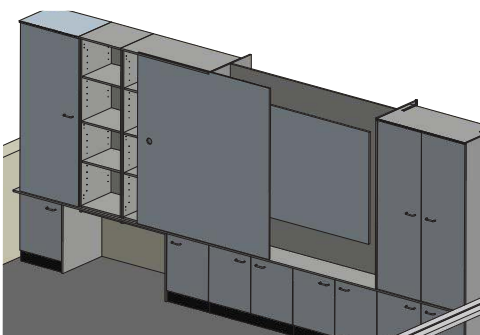

Paul Baker - Estates Manager, Tewkesbury School

Maths classroom before refurbishment

PROJECT BRIEF

The school's brief was to develop a bespoke design for new teaching walls to be installed into their outdated 1970s maths block. A design was to be developed for the nine rooms so that each room offered the same facilities despite differences in floorplan.

THE RESULTS

Our team developed a design in conjunction with the school incorporating all the storage required, including lockable cupboards for the teaching staff. The units were panelled from floor to ceiling to give a modern seamless look and included sliding whiteboards.

The school initially had the budget to install one teacher wall and managed the refurbishment element themselves. The teaching staff were impressed with the transformation of the first room and the following year the budget was found to upgrade the other eight maths classrooms.

For the second phase of works the school saw the advantage of Klick managing the refurbishment side of the project and a programme of work was agreed to include a full turnkey package. The project was started before the end of term to allow for a phased handover, giving the teaching staff time to gradually move back into the rooms, well ahead of the start of term.

PROJECT DETAILS

- Free comprehensive design and consultation service
- 2D & 3D CAD drawings provided
- Full project management service
- Removal of existing furniture and redundant services
- Install new mains electric board & dado trunking
- New emergency lighting & LED lights throughout
- Provide for interactive services
- Plastering & decoration renewed
- New ceilings & flooring
- Supply and installation of furniture
- Commissioning and certification of all works.

PROJECT DESCRIPTION

Refurbishment of 8 classrooms and installation of 9 teaching walls

VALUE

£114K

CLIENT

Tewkesbury School, Gloucester

DURATION OF WORK

7 week phased programme
