

# Bespoke Clean Room Furniture Installation

## Clean Room Biotech Laboratory

### PROJECT BRIEF

The priority was to design clean room furniture for the facility to improve the workflow and increase storage capacity within the interlock room. The client was looking for a supplier who could upgrade the room with no interruption to their production schedule.

### THE RESULTS

Fitted furniture for clean room

The Klick design team worked on a bespoke furniture design for the storage of lab shoes, gowns and coats. The furniture design was to be suitable for a sterile clean room environment and have no visible fixings.

Delivery was arranged around working hours to minimise disruption to the department. Installation commenced on Friday afternoon, running through the night and was completed on Saturday.

The new clean room furniture has improved functionality in the interlock room and the revised layout means that more items can be stored.

The client requested confidentiality on this project and so we have withheld their name. Klick regularly work on projects of a sensitive nature where non-disclosure agreements are required.

### TESTIMONIAL

Shoe storage

“Klick developed a practical furniture design for an interlock room in conjunction with the client, as part of an upgrade of their clean room facilities. The new bespoke furniture system speeded up processes by providing designated storage spaces for each employee. This has increased capacity in the department as items can be identified more easily. Delivery and furniture installation was carried out around working hours in order to minimise disruption to production schedules. The client is very happy with the quality of the product, which has no visible fixings, and Klick are currently working on phase 2 of the works to provide additional furniture”.

**Richard Fox - Healthcare Consultant**

### PROJECT DETAILS

- Pre-installation survey
- Design of furniture & layout
- 2D CAD drawings provided
- Manufacture of bespoke furniture
- Close liaison with site team
- Dedicated project manager
- Installation of all fitted furniture

### PROJECT DESCRIPTION

Installation of Clean Room Furniture

**VALUE** £10.5k

### CLIENT

Biotech Laboratory

### DURATION OF WORK

1.5 days

Numbered hooks and clean gown storage
