

TESTIMONIAL

“From the first conversation with Javed I knew we were working with the right company to fulfil our needs. Klick has delivered and installed a very high-quality workable lab.

Klick has a new client!”

Adam MacKenzie – Chief Operating Officer, Cannapharma Ltd

PROJECT BRIEF

Production lab with Trespa fixed lab benching

Cannapharma received an Innovate UK Smart Grant to assist in the development of an accelerated oxidation process for CBD. The funding will help scale-up their research and demonstrate its viability at scale. Klick were commissioned to complete the laboratory furniture installation for 3 areas in their new technical facility.

Their work requires a clean pharmaceutical environment and with this in mind the Klick designers developed suitable layouts for the production lab, QC lab and formulation lab.

Design for Laboratory Furniture Installation

Cannapharma are involved in creating new technologies to produce cannabinoids and formulations for a variety of ailments and diseases. This requires the use of precision equipment and liquid chromatography instrumentation. Balance tables were specified which were designed by Klick, featuring anti vibration feet, Trespa worktops and a scratch resistant granite slab for additional stability.

Installation of Flexible Lab Furniture

Cannapharma’s research team selected mobile cabinets to allow flexibility on setting up the laboratory facility. Once processes are established the cabinets can be wheeled into their positions to suit workflow requirements. Mobile units have the additional advantage of being easily moveable to accommodate any future changes in staff numbers or processes.

An additional technical feature included local exhaust extraction arms which are ceiling mounted and used within the laboratory to reduce the risk of employee exposure to noxious substances.

Klick maintained a really positive working relationship throughout the project and the staff at Cannapharma were delighted with the quality of the laboratory furniture and the functionality of the new facility.

QC lab with LEV extraction arms

PROJECT DETAILS

- Pre-installation survey
- Design of furniture & layout
- 2D & 3D drawings provided
- Close liaison with site team
- Manufacture of furniture
- Dedicated project manager
- Installation of all fitted furniture

PROJECT DESCRIPTION

Installation of furniture for Production lab, QC lab and Formulation lab

VALUE £35.5k

CLIENT

Cannapharma Ltd

DURATION OF WORK

1 week

Formulation lab with balance table & mobile units

Double peninsula & fixed sink unit
