

LABORATORY FURNITURE SAFETY AND EFFICIENCY

TIPS FOR CREATING A SAFE
WORKING ENVIRONMENT

MATERIAL SELECTION

Select materials that withstand exposure to corrosive substances. Opt for worktops such as Trespa which are easy to clean & maintain, preventing contamination.

ERGONOMICS

Ensure seating supports comfortable working positions for lab personnel. Consider adjustable bench options to suit different working heights.

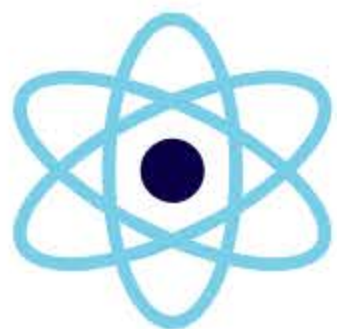

DURABILITY

Choose robust materials and designs to handle heavy equipment loads and daily wear and tear.

SAFE STORAGE SOLUTIONS

Provide secure cabinets for hazardous chemicals, flammable substances and sensitive materials

SPACING & LAYOUT

Maintain adequate space for safe movement and emergency access, minimising congestion.

EMERGENCY EQUIPMENT ACCESSIBILITY

Emergency response equipment like eyewash stations and spill kits should be positioned for immediate access.
